### **AUTHORISATION FOR TREATMENT I PAYMENT**

ACTIONISATION TO THEATINENT
I hereby authorise the Administration, Medical and Nursing and Paramedical, Staff of the Hospital Investigate treat and administer such drugs as may be necessary and to perform such operation under anaesthesia or other wise as may be deemed necessary and / or advisable in the diagnosis and treatment of my illness / patient
I hereby under take to settle all the bills for hospitalisation charges related to me/the patient named overleaf on a periodic basis. In any case, I shall pay all the dues before getting discharged from the hospital.
However, in case I fail to pay the charges due to the hospital as agreed above, I hereby authorise the hospital to transfer me/the patient to any other hospital/institution for further treatment as deemed fit and proper by the hospital authorities.
I also acknowledge having been informed if the General Rules and Regulations of the Hospital and that all cash, jewellery and valuables belonging to the patient or their attendants have been removed to a place of safety / handed over to the next of kin and I absolve the hospital of any responsibility with regard to any loss.
I have read out and explained the contents of the above to the Signatory in his vernacular .
சிகீச்சை, பணம் செலுத்துதல் முதலியவை செய்ய ஆதிகாரம் வழங்குதல்
இதன் மூலமாக நான் நிர்வாகம், மருத்துவம், தாதியர், ஏனைய மருத்துவ ஊழியர்கள் எனக்கு / நோயாளி க்கு தேவைப்பட்ட சோதனைகளை செய்து மருந்துகளை கொடுக்கவும். மயக்க
மருந்துகள் கொடுத்து செய்முறைகள்/அறுவை சிகீச்சை செய்யவும் அதிகாரம் வழங்குகீறேன். நான் / இதில் குறித்துள்ள நோயாளின் செலவுக்கன தொகை முழுவதும் செலுத்த இதன் மூலம் உறுதி அளிக்கீறேன்.
மேல் கூறியது போல் வேளை நான் தங்கள் மருத்துவத்திற்கான செலவுகளை கட்டத் தவறினால் என்னை நோயாளியை வேறொரு மருத்துவமனைக்கு, பிற சிகீச்சை / அறுவை சிகீச்சை செய்ய இடமாற்ற ஒப்புதலை எனது உறவினர்கள் மூலமாக பெற நான் அதிகாரம் அளிக்கீறேன்.
மருத்துவமணையின் பொது சட்ட தீட்டங்கள் பற்றி தெரிவிக்கிப்பட்டிருக்கிறேன்.
நோயாளிக்கு உரிமையான எல்லா பணம், நகை மதீப்பிடக்கூடி பொருட்கள் யாவும் பாதுகாப்பான இடத்திற்கு மாறுபட்டுவிட்டன / அல்லு நெருங்கிய உறவினரிடம் கொடுக்கப்பட்டுள்ளது. இந்த மருத்துவமனை எனது/நோயாளியின் எந்தவித நஷ்டத்திற்கு பொறுப்பில்லை என உறுதி செய்கிறேன்.

மேற்குறிப்பிட்ட அனைத்தும் எனக்கு விவரிக்கப்பட்ட பிறகுதான் கையொப்பமிட்டேன்.

## **GENERAL CONSENT FOR ADMISSION**

i,	the Patient or Representative of patient have
	lease tick the correct option above and below)
	□ Read □ Been explained this consent form in English, which I fully understand.
	State of the second of the sec
•	I give my full consent and authorization for admission and treatment at this hospital. The proposed treatment
	, plan has been explained to me.
•	I consent and authorize the hospital, treating doctors, nursing, technical and paramedical staff to provide relevant care and to conduct diagnostic as deemed necessary by the treating doctor/team.
, <b>.</b> •.	'I also consent to use of assistants such as resident doctors, other doctors, nurses, and other healthcare workers by the hospital and treating doctor/ team.
•	I consent for clinical consultation, admission, disclosure of information required for clinical management (under confidence), routine medical examination (physical examination, palpation, percussion, auscultation), routine lab and imaging investigations, general nursing care, diet and physiotherapy assessment and counselling.
•	I have been explained about the proposed care plan, expected result(s), possible outcome(s) and expected cost of treatment/ hospital stay.
•	I understand that the hospital will take due care of me / my patient but, that there is always a possibility of an unexpected complication(s) which may necessitate longer stay and / or use of intensive care services. In such cases, procedure different from those contemplated and other intervention(s) may sometimes be needed.
•	I declare that, I have and will inform the doctor of my medical history including previous illnesses, allergies, drug reaction(s), surgical procedure, relevant medical family history and all other facts relevant to my treatment. I shall not hold the hospital/doctor responsible for any consequences which may arise due to non-disclosure of relevant information on my part.
•	I declare that I have been explained about my rights and responsibilities.
•	I have been made aware of the rules and regulations of the hospital including those related to security and I promise to abide by them.
•	I understand that in case of some unexpected event occurring during the course of my stay I may be suggested a transfer to another hospital / healthcare organization, as considered appropriate by my treating doctor.

I understand that, drugs, consumables and devices will be charged on an 'as actual' basis as per the hospital
tariff. I have been informed and I understand that there can be usage of certain reprocessed items during the
course of the treatment. I also understand that only full strips of medicines shall be issued and returned. I
declare that I take full responsibility of settling the bill before leaving the hospital premises at the time of

- I further deciare that I have been given an opportunity to ask question(s) related to my admission, care plan and proposed hospital stay, and that such questions have been answered to my satisfaction.
  - I declare that I have received and fully understood the information provided in this consent form, that I have been given an opportunity to ask questions relating to my admission, care plan and proposed hospital stay, and that all my questions have been answered to my entire satisfaction and there are no misconceptions or false hopes in my mind. I further declare that all fields (of this form) requiring insertion or completion were filled in my presence at the time of my signing this form.
  - I, the above-named Patient / named patient's representative, do further hereby declare that I am above 18 years
    of age as on the date of signing this form, mentally sound and am giving consent without any fear, threat or false
    misconception.

**EFFORT ANGINA** 

? OLD IWMI

COMPLETE RIGHT BUNDLE BRANCH BLOCK

ADEQUATE LV FUNCTION

TYPE II DIABETES MELLITUS

SYSTEMIC HYPERTENSION

PROCEDURE: CORONARY ANGIOGRAM DONE ON 23.12.2023 – TRIPLE VESSEL DISEASE.

#### **BRIEF HISTORY:**

Mr. Manoharan. N, 69 years old male, presented with complaints of chest pain on & off. He was advised Coronary angiogram and referred to Medway Heart Institute on 27.12.2023 for which he has been admitted.

### ON EXAMINATION:

HR: 76bpm;

BP: 143/80mmHg:

SPO<sub>2</sub>: 99% in room air

CVS: S1S2+;

RS: Clear:

CNS: NFND:

Abd: Soft

#### **INVESTIGATIONS:**

BLOOD: HB - 15.7gm/dl, TWBC - 8600cell/cumm, PLT - 266000 cells/cumm, Urea - 10.10mg/dl, Creatinine – 0.68mg/dl.

ECG: sinus rhythm, HR – 72bpm, RBBB.

ECHO: RWMA. Mild thinning & hypokinesia of apical inferior segments of LV. Adequate LV systolic function. EF - 71%. Grade I LV diastolic dysfunction. Mild mitral annulus calcification. Mild MR. Aortic valve sclerosis. No aortic stenosis or regurgitation. Normal pulmonary artery pressures. False tendon in LV.

ANGIOGRAM / CORONARY ANGIOPLASTY

Sex: M/F

CONDITION AND PROCEDURE

Dr. Maxwell. has explained that I have the following condition:

Fat (cholesterol) and calcium can build up in the arteries like rust in old pipes. It can stop the flow of blood to the heart. This can cause angina or a heart attack. The Coronary Angiography procedure is performed to show up the amount of disease in the coronary arteries, the blood vessels that supply the heart with bleed. After an injection of local anaesthetic, a fine tube (catheter) is put into the artery in the groin/hand. The tube is carefully passed into each coronary artery in turn. A series of video pictures are taken using x-rays and an iodine containing contrast medium (x-ray dye). The contrast medium may be injected into the main pumping chamber of the heart (left ventricle). This helps us to find out whether you have any narrowing or blockage of your coronary arteries. The doctor can then tell you which treatment is best for you after carefully studying and discussing your pictures. This may be an operation such as a coronary by-pass or a procedure called an angioplasty (the arteries are widened using a small sausage shaped balloon). Sometimes, drugs alone may be a suitable option.

#### RISKS OF THIS PROCEDURE

The risk of coronary angiography depends on:

(i)The nature of coronary artery disease (ii)The pumping status of the heart (iii) Your age and general health These are some of the more serious risks that can happen, but are not the only risks:

Less than 1 in 10,000 (0.0001%)	(a) skin injury from radiation, causing, reddening of the skin			
1 in 1000 people (0.001%)	<ul> <li>(b) A stroke. This can cause paralysis and long term disability</li> <li>(c) Heart attack.</li> <li>(d) A dangerous reaction to the x-ray contrast medium (dye). If this happens, you may have severe reactions such as asthma, shock and convulsions. Death in extremely rare cases about 1 in 2,50,000 to 4,00,000 injections.</li> <li>(e) Need for major surgery to the leg at the puncture site.</li> <li>(f) Need for emergency heart surgery or angioplasty.</li> <li>(g) A higher lifetime risk from x-ray exposure.</li> <li>(h) Death</li> </ul>			
1 in 100 people (0.01%)	<ul> <li>(I) the heart may not beat in a proper rhythm which will need urgent treatmer</li> <li>(j) Surgical repair of the groin puncture site. This may need a longer stay in hospital.</li> <li>(k) Minor reaction to contrast medium such as hives.</li> <li>(l) Loss/impairment of kidney function due to the contrast medium</li> </ul>			
1 in 20 people (0.05%)	(m) Major bruising or swelling at the groin punture site			
Most People	(n) Minor bruising			

PATIENT CONSENT:

Packnowledge that Dr. has explained my medical condition and the proposed procedure. I understand the risks of the procedure, the anaesthetic including the risks that are specific to me and the likely outcomes if complications occur. The Doctor has explained other relevant treatment options their risks and my right to refuse the treatment. He has explained my prognosis and the risks of not having the procedure. I was able to ask questions and raise concerns with the doctor about my condition, the procedure and its risks, and my treatment options. My questions and converns have been discussed and answered to my satisfaction. I understand that in the unlikely event of complications, I may require a blood transfusion, an additional procedure or surgery. The doctor has explained to me that if immediate life-threatening events happen during the procedure, they will be treated accordingly. I understand that no guarantee has been made that the procedure will improve the condition On the basis of the above statements,

### TRANSRADIAL CORONARY ANGIOGRAM REPORT

Patient Name:	Mr. MANOHARAN.N	ID:	MHI202381521			
Age/Gender :	69 M 3487		nder: 69 M		IPH:	IPH2023002611
Cath No. :			DOP:	27.12.2023		
Done by	Assisted by Technician		Phy	sician assistant		
Dr.Gnanavelu	Ms. Panchavarnam	Mr. Pandiyan	Ms. Shalini			

DIAGNOSIS: EA; ?OLD IWMI; COMPLETE RBBB; T2DM; HBP; RWMA; ADEQUATE LV FUNCTION

Access: Right radial artery

Total exposure time: 226.6"

Hardware used: 5F sheath, 5F TIG

Total DAP: 19.82 Gy.cm<sup>2</sup>

Contrast used: CONTRAPAQUE 50 ml

Total RAK: 69.05 mGy

Medications given: Inj NTG 200 mcg & Inj Heparin 2500 IU IA

Hemodynamic data: Aortic pressure: 148/83(104) mmHg; HR 77 bpm; SpO2 100%

Selective Coronary angiogram done in multiple angulated views:

ARTERY	FINDINGS
LEFT MAIN	Distal LM has mild plaque. Bifurcates into LAD & LCx. Calcified coronaries.
LAD	Type 3 vessel. Proximal LAD has luminal irregularities with calcification. Mid LAD has 90-95% discrete stenosis. Distal LAD has luminal irregularities. Gives 2 major diagonals. First diagonal ostium shows mild disease. Second diagonal bifurcates into superior and inferior division. Inferior division has diffuse disease.
LCx	Nondominant. Ostioproximal LCX has 90% discrete stenosis. Distal LCX is a thin vessel with diffuse disease. Gives 2 major OMs. OM1 proximal part has 90% tubular stenosis. OM2 distal part has diffuse disease.
RCA	Dominant. Proximal and Mid RCA have luminal irregularities with dense adventitial calcification. Distal RCA has 90-95% tubular stenosis. PDA proximal part has diffuse disease upto 90% stenosis. PLV has luminal irregularities.
IMA	LIMA & RIMA are normal. Left vertebral artery ostium has 30% stenosis.

FINDINGS: RIGHT DOMINANT SYSTEM; TRIPLE VESSEL DISEASE

ADVICE: CABG X Grafts to LAD, MAJOR OM & DISTAL RCA/PDA

	BRADEN S	CALE FOR PREDICTI	NG . HESSUHE INJUR	Y RISK Time:		منا چ	کور سار
SENSORY PERCEPTION ability to respond meaning-fully to pressure-related discomfort	1. Completely Limited Unresponsive (does not moan, flinch,or grasp) to painful stimuli, due to diminished level of consciousness or sedation OR limited ability to feel pain over most of body	2. Very Limited Responds only to painful stimuli. Cannot communicate discomfort except by moaning or restlessness OR has a sensory impairment which limits the ability to feel pain or discomfort over 1/2 of body	3. Slightly Limited	4. No Impairment Responds to verbal commands. Has no sensory deficit which would limit ability to feel or voice pain or discomfort	4	A	
MOISTURE degree to which skin is exposed to moisture	1. Constantly Moist Skin is kept moist almost constantly by perspiration, urine etc. Dampness is detected every time patient is moved or turned	2. Very Moist Skin is often, but not always moist. Linen must be changed at least once a shift	Skin is occasionally moist, requiring an extra linen change approximately once a day	4. Rarely Moist Skin is usually dry, linen only requires changing at routine intervals	97	3	
ACTIVITY degree of physical activity	1. Bedfast Confined to bed	2. Chairfast Ability to walk severely limited or non-existent. Cannot bear own weight and / or must be assisted into chair or wheelchair	3. Walks Occasionally Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair	4. Walks Prequently Walks outside room at least twice a day and inside room at least once every two hours during waking hours	7	4	
MOBILITY ability to change and control body position	Completely Immobile     Does not make even slight changes in body or extremity position without assistance	2. Very Limited  Makes occasional slight changes in body or extremity position but unable to make frequent or significant changes independently	3. Slight Limited Makes frequent through slight changes inbody or extremity position independently	4. Ne Limitation Makes major and frequent changes in position without assistance	٤	A	
NUTRITION usual food intake pattern	1. Very Poor Never eats a complete meal. Rarely eats more than any food offered. Eats 2 servings or less of protein(meat or dairy products) per day. Takes fluids poorly. Does not take a liquid dietary supplement OR Is NPO and / or maintained on clear liquids or IV's for more than 5 days	2. Probably inadequate Rarely eats a complete meal and generally eats only about 2 of any food offered. Protein intake includes only 3 servings of meat or diary products per day. Occasionally will take a dietary supplement	3. Adequate Eats over half of most meals. Eats a total of 4 servings of protein (meat, diary products) per day. Occasionally will refuse a meal, but will usually take a supplement when offered OR Is on a tube feeding or TPN regimen which probably meets most of nutritional needs	4. Excellent Eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and diary products. Occasionally eats between meals. Does not require supplementation	4	H	
FRICTION & SHEAR	1. Problem  Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent re-positioning with maximum assistance. Spasticity, contractures or agitation leads to almost constant friction	2. Potential Problem  Moves feebly or requires minimum assistance. During a move skin probably slides to some extent against sheets, chair, restraints or other devices. Maintains relatively good position in chair or bed most of the time but occasionally slides down	3. No Apparent Problem  Moves in bed and in chair independentl strength to lift up completely during move. Nor chair	TOTAL SCORE Initial & Emp. No.	4 23	H
