#### **AUTHORISATION FOR TREATMENT I PAYMENT**

I hereby authorise the Administration, Medical and Nursing and Paramedical, Staf f of the Hospital Investigate treat and
administer such drugs as may be necessary and to perform such operation under anaesthesia or other wise as may be
deemed necessary and / or advisable in the diagnosis and treatment of my illness / patient/ (Relationship).
who is my 4father(Relationship).

I hereby under take to settle all the bills for hospitalisation charges related to me/the patient named overleaf on a periodic basis. In any case, I shall pay all the dues before getting discharged from the hospital.

However, in case I fail to pay the charges due to the hospital as agreed above, I hereby authorise the hospital to transfer me/the patient to any other hospital/institution for further treatment as deemed fit and proper by the hospital authorities.

I also acknowledge having been informed if the General Rules and Regulations of the Hospital and that all cash, jewellery and valuables belonging to the patient or their attendants have been removed to a place of safety / handed over to the next of kin and I absolve the hospital of any responsibility with regard to any loss.

I have read out and explained the contents of the above to the Signatory in his vernacular . சிகீச்சை, பணம் செலுத்துதல் முதலியவை செய்ய அதிகாரம் வழங்குதல்

இதன் மூலமாக நான் நீர்வாகம், மருத்துவம், தாதியர், ஏனைய மருத்துவ ஊழியர்கள் எனக்கு / நோயாளி .................................க்கு தேவைப்பட்ட சோதனைகளை செய்து மருந்துகளை கொடுக்கவும். மயக்க மருந்துகள் கொடுத்து செய்முறைகள்/அறுவை சிகீச்சை செய்யவும் அதிகாரம் வழங்குகீறேன். நான் / இதில் குறித்துள்ள நோயாளின் செலவுக்கன தொகை முழுவதும் செலுத்த இதன் மூலம் உறுதி அளிக்கீறேன்.

மேல் கூறியது போல் வேளை நான் தங்கள் மருத்துவத்திற்கான செலவுகளை கட்டத் தவறினால் என்னை நோயாளியை வேறொரு மருத்துவமனைக்கு, பிற சிகிச்சை / அறுவை சிகிச்சை செய்ய இடமாற்ற ஒப்புதலை எனது உறவினர்கள் மூலமாக பெற நான் அதிகாரம் அளிக்கிறேன்.

மருத்துவமனையின் பொது சட்ட தீட்டங்கள் பற்றி தெரிவிக்கீப்பட்டிருக்கீறேன்.

நோயாளிக்கு உரிமையான எல்லா பணம், நகை மதிப்பிடக்கூடி பொருட்கள் யாவும் பாதுகாப்பான இடத்திற்கு மாறுபட்டுவிட்டன / அல்லு நெருங்கிய உறவினரிடம் கொடுக்கப்பட்டுள்ளது. இந்த மருத்துவமனை எனது/நோயாளியின் எந்தவித நஷ்டத்திற்கு பொறுப்பில்லை என உறுதி செய்கிறேன்.

மேற்குறிப்பிட்ட அனைத்தும் எனக்கு விவரிக்கப்பட்ட பிறகுதான் கையொப்பமிட்டேன்.

## **GENERAL CONSENT FOR ADMISSION**

/_
(please tick the correct option above and below)
Read
☐ Been explained this consent form in English, which I fully understand.
<ul> <li>I give my full consent and authorization for admission and treatment at this hospital. The proposed treatment plan has been explained to me.</li> </ul>

- I consent and authorize the hospital, treating doctors, nursing, technical and paramedical staff to provide relevant care and to conduct diagnostic as deemed necessary by the treating doctor / team.
- I also consent to use of assistants such as resident doctors, other doctors, nurses, and other healthcare workers by the hospital and treating doctor / team.
- I consent for clinical consultation, admission, disclosure of information required for clinical management (under confidence), routine medical examination (physical examination, palpation, percussion, auscultation), routine lab and imaging investigations, general nursing care, diet and physiotherapy assessment and counselling.
- I have been explained about the proposed care plan, expected result(s), possible outcome(s) and expected cost of treatment/hospital stay.
- I understand that the hospital will take due care of me / my patient but, that there is always a possibility of an
  unexpected complication(s) which may necessitate longer stay and / or use of intensive care services. In such
  cases, procedure different from those contemplated and other intervention(s) may sometimes be needed.
- I declare that, I have and will inform the doctor of my medical history including previous illnesses, allergies, drug
  reaction(s), surgical procedure, relevant medical family history and all other facts relevant to my treatment. I
  shall not hold the hospital/ doctor responsible for any consequences which may arise due to non-disclosure of
  relevant information on my part.
- I declare that I have been explained about my rights and responsibilities.
- I have been made aware of the rules and regulations of the hospital including those related to security and I promise to abide by them.
- I understand that in case of some unexpected event occurring during the course of my stay I may be suggested a transfer to another hospital / healthcare organization, as considered appropriate by my treating doctor.
- I understand that, drugs, consumables and devices will be charged on an 'as actual' basis as per the hospital
  tariff. I have been informed and I understand that there can be usage of certain reprocessed items during the
  course of the treatment. I also understand that only full strips of medicines shall be issued and returned. I
  declare that I take full responsibility of settling the bill before leaving the hospital premises at the time of
  discharge.

- I further declare that I have been given an opportunity to ask question(s) related to my admission, care plan and proposed hospital stay, and that such questions have been answered to my satisfaction.
- I declare that I have received and fully understood the information provided in this consent form, that I have been
  given an opportunity to ask questions relating to my admission, care plan and proposed hospital stay, and that
  all my questions have been answered to my entire satisfaction and there are no misconceptions or false hopes
  in my mind. I further declare that all fields (of this form) requiring insertion or completion were filled in my
  presence at the time of my signing this form.
- I, the above-named Patient / named patient's representative, do further hereby declare that I am above 18 years
  of age as on the date of signing this form, mentally sound and am giving consent without any fear, threat or false
  misconception.

#### **AGNOSIS:**

CAD - IWMI (12/2023)

NORMAL LV SYSTOLIC FUNCTION

SYSTEMIC HYPERTENSION

ANEMIA

ULCER LEFT FOOT

PROCEDURE: CORONARY ANGIOGRAM DONE ON 03.01.2024 – SIGNIFÍCANT RCA DISEASE.

#### BRIEF HISTORY:

Mr. Arumugam Puchi, 53 years old male, presented with complaints of chest pain. He was evaluated in ESIC hospital and advised Coronary angiogram and referred to Medway Heart Institute on 03.01.2024 for which he has been admitted.

#### ON EXAMINATION:

BP: 152/87mmHg;

SPO<sub>2</sub>: 98% in room air

VS: S1S2+; RS: Clear;

CNS: NFND;

Abd: Soft

#### **INVESTIGATIONS:**

BLOOD: Hb- 8.7gm/dl, TWBC - 9900cells/cumm, PLT - 567000cells/cumm, Urea - 26.24mg/dl, Creatinine - 0.84mg/dl, Sodium - 141mg/dl, Potassium - 4.59mg/dl, PT/INR - 12.7/1.1.

ECG: sinus rhythm, HR – 89 bpm. ST elevation in II, III & aVF. ST depression in I, aVL.

**ECHO**: Mitral annular calcification(+). ¼ MR. No RWMA Normal LV systolic function. EF – 71%. 3.1mm PE, posterior to LV. clot / PHT.

<u>IGIOGRAM / CORONARY ANGIOPLASTY</u>

Sex: M/F 534

UHID

#### CONDITION AND PROCEDURE

Fat (cholesterol) and calcium can build up in the arteries like rust in old pipes. It can stop the flow of blood to the heart. This can cause angina or a heart attack. The Coronary Angiography procedure is performed to show up the amount of disease in the coronary arteries, the blood vessels that supply the heart with bleed. After an injection of local anaesthetic, a fine tube (catheter) is put into the artery in the groin/hand. The tube is carefully passed into each coronary artery in turn. A series of video pictures are taken using x-rays and an iodine containing contrast medium (x-ray dye). The contrast medium may be injected into the main pumping chamber of the heart (left ventricle). This helps us to find out whether you have any narrowing or blockage of your coronary arteries. The doctor can then tell you which treatment is best for you after carefully studying and discussing your pictures. This may be an operation such as a coronary by-pass or a procedure called an angioplasty (the arteries are widened using a small sausage shaped balloon). Sometimes, drugs alone may be a suitable option.

#### RISKS OF THIS PROCEDURE

The risk of coronary angiography depends on:

(i)The nature of coronary artery disease (ii)The pumping status of the heart (iii) Your age and general health These are some of the more serious risks that can happen, but are not the only risks:

Less than 1 in 10,000 (0.0001%)	(a) skin injury from radiation, causing, reddening of the skin
1 in 1000 people (0.001%)	<ul> <li>(b) A stroke. This can cause paralysis and long term disability</li> <li>(c) Heart attack.</li> <li>(d) A dangerous reaction to the x-ray contrast medium (dye). If this happens, you may have severe reactions such as asthma, shock and convulsions. Death in extremely rare cases about 1 in 2,50,000 to 4,00,000 injections</li> <li>(e) Need for major surgery to the leg at the puncture site.</li> <li>(f) Need for emergency heart surgery or angioplasty.</li> <li>(g) A higher lifetime risk from x-ray exposure.</li> <li>(h) Death</li> </ul>
1 in 100 people (0.01%)	<ul> <li>(I) the heart may not beat in a proper rhythm which will need urgent treatment</li> <li>(j) Surgical repair of the groin puncture site. This may need a longer stay in hospital.</li> <li>(k) Minor reaction to contrast medium such as hives.</li> <li>(l) Loss/impairment of kidney function due to the contrast medium</li> </ul>
1 in 20 people (0.05%)	(m) Major bruising or swelling at the groin punture site
Most People	(n) Minor bruising

#### TRANSRADIAL CORONARY ANGIOGRAM REPORT

Patient Name:	Mr. ARUMUGAM PUCHI		ID:	MHI20240017
Age/Gender :	53 M		IPH:	IPH202400019
Cath No. :	3526		DOP:	03.01.2024
Done by	Assisted by	Technician	Physician assistant	
Dr.Gnanavelu/	Ms. Bhavatharini	Mr. Sathish		Ms. Shalini
Dr. SalaiSudhan				

DIAGNOSIS: CAD-IWMI (12/2023); HBP; ANEMIA; NORMAL LV FUNCTION

Access: Right radial artery

Total exposure time: 840.6"

Hardware used: 5F sheath, 5F TIG,

DAP: 52,77 Gy.cm<sup>2</sup>

Contrast used: CONTRAPAQUE 50ml

Total RAK: 139.2 mGy

Medications given: Inj NTG 200 mcg & Inj Heparin 2500 IU IA

Hemodynamic data: Aortic pressure 165/85(97) mmHg; HR 83 bpm; SpO2 100%

Significant tortuosity noted in Left Subclavian artery.

Selective Coronary angiogram done in multiple angulated views:

ARTERY	FINDINGS
LEFT MAIN	Appears normal, Bifurcates into LAD & LCX.
LAD	Type 3 vessel. Proximal and Mid LAD are normal. Distal LAD has luminal irregularities. Gives 3 diagonals and many septals. First diagonal is a major vessel, ostium shows mild disease.
LCx	Non Dominant. Proximal and Distal LCX have luminal irregularities. Gives 4 OMs which appear normal. OM3 is a major vessel.
RCA	Dominant. Proximal RCA has 90% tubular stenosis. Mid and Distal RCA have luminal irregularities. PDA and PLV appear normal.

FINDINGS: RIGHT DOMINANT SYSTEM; SIGNIFICANT RCA DISEASE

**ADVICE: PTCA TO RCA**

Every heart beat counts

(A Unit of United Al	liance Healthcare Pvt Ltd)		119 HO THE THE STEELS COMPANY AND THE PERSON AND TH	Date:	9	1	24
	BRADEN S	CALE FOR PREDICTION	NG PRESSURE INJUR	Y RISK Time:		E	أزر
SENSORY PERCEPTION ability to respond meaning-fully to pressure-related discomfort	Completely Limited     Unresponsive (does not moan, flinch,or grasp) to painful stimuli, due to diminished level of consciousness or sedation OR limited ability to feel pain over most of body	2. Very Limited Responds only to painful stimuli. Cannot communicate discomfort except by moaning or restlessness OR has a sensory impairment which limits the ability to feel pain or discomfort over 1/2 of body	3. Slightly Limited Responds to verbal commands, but cannot always communicate discomfort or the need to be turned OR had some sensory impairment which limits ability to feel pain or discomfort in 1 or 2 extremities	A-No Impairment Responds to verbal commands. Has no sensory deficit which would limit ability to feel or voice pain or discomfort	4	Ĵ	
MOISTURE degree to which skin is exposed to moisture	1. Constantly Moist Skin is kept moist almost constantly by perspiration, urine etc. Dampness is detected every time patient is moved or turned	2. Very Moist Skin is often, but not always moist. Linen must be changed at least once a shift	3. Occasionally Moist Skin is occasionally moist, requiring an extra linen change approximately once a day	4 Rarely Moist Skin is usually dry, linen only requires changing at routine intervals	5	4	
ACTIVITY degree of physical activity	Bedfast Confined to bed	2. Chairfast Ability to walk severely limited or non-existent. Cannot bear own weight and / or must be assisted into chair or wheelchair	3. Walks Occasionally Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair	4 Walks Frequently Walks outside room at least twice a day and inside room at least once every two hours during waking hours	Ч	4	
MOBILITY ability to change and control body position	Completely Immobile     Does not make even slight changes in body or extremity position without assistance	2. Very Limited  Makes occasional slight changes in body or extremity position but unable to make frequent or significant changes independently	3. Slight Limited Makes frequent through slight changes in body or extremity position independently	4. No Limitation Makes major and frequent changes in position without assistance	4	4	
NUTRITION usual food intake pattern	1. Very Poor Never eats a complete meal. Rarely eats more than any food offered. Eats 2 servings or less of protein(meat or dairy products) per day. Takes fluids poorly. Does not take a liquid dietary supplement OR Is NPO and / or maintained on clear liquids or IV's for more than 5 days	2. Probably Inadequate Rarely eats a complete meal and generally eats only about 2 of any food offered. Protein intake includes only 3 servings of meat or diary products per day. Occasionally will take a dietary supplement	3. Adequate  Eats over half of most meals. Eats a total of 4 servings of protein (meat, diary products) per day. Occasionally will refuse a meal, but will usually take a supplement when offered OR is on a tube feeding or TPN regimen which probably meets most of nutritional needs	4. Excellent Eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and diary products. Occasionally eats between meals. Does not require supplementation		4	
FRICTION & SHEAR	1. Problem  Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent re-positioning with maximum assistance. Spasticity, contractures or agitation leads to almost constant friction	2. Potential Problem  Moves feebly or requires minimum assistance. During a move skin probably slides to some extent against sheets, chair, restraints or other devices. Maintains relatively good position in chair or bed most of the time but occasionally slides down	3. No Apparent Problem  Moves in bed and in chair independently strength to lift up completely during move. No or chair	flaintains good position in bed  TOTAL SCORE	3 23 5008	3 2> Ours
