GENERAL CONSENT FOR ADMISSION

ا, _ س	the Patient or Representative of patient have
(pi	lease tick the correct option above and below) 1 Read
F	Been explained this consent form in English, which I fully understand.
•	t
•	I give my full consent and authorization for admission and treatment at this hospital. The proposed treatment plan has been explained to me.
•	I consent and authorize the hospital, treating doctors, nursing, technical and paramedical staff to provide relevant care and to conduct diagnostic as deemed necessary by the treating doctor / team.
•	I also consent to use of assistants such as resident doctors, other doctors, nurses, and other healthcare workers by the hospital and treating doctor/ team.
•	l consent for clinical consultation, admission, disclosure of information required for clinical management (under confidence), routine medical examination (physical examination, palpation, percussion, auscultation), routine lab and imaging investigations, general nursing care, diet and physiotherapy assessment and counselling.
•	I have been explained about the proposed care plan, expected result(s), possible outcome(s) and expected cost of treatment/ hospital stay.
•	I understand that the hospital will take due care of me / my patient but, that there is always a possibility of an unexpected complication(s) which may necessitate longer stay and / or use of intensive care services. In such cases, procedure different from those contemplated and other intervention(s) may sometimes be needed.
•	I declare that, I have and will inform the doctor of my medical history including previous illnesses, allergies, drug reaction(s), surgical procedure, relevant medical family history and all other facts relevant to my treatment. I shall not hold the hospital/ doctor responsible for any consequences which may arise due to non-disclosure of relevant information on my part.
•	I declare that I have been explained about my rights and responsibilities.
•	I have been made aware of the rules and regulations of the hospital including those related to security and I promise to abide by them.
•	I understand that in case of some unexpected event occurring during the course of my stay I may be suggested a transfer to another hospital / healthcare organization, as considered appropriate by my treating doctor.
•	I understand that, drugs, consumables and devices will be charged on an 'as actual' basis as per the hospital tariff. I have been informed and I understand that there can be usage of certain reprocessed items during the course of the treatment. I also understand that only full strips of medicines shall be issued and returned. I

declare that I take full responsibility of settling the bill before leaving the hospital premises at the time of

- I further declare that I have been given an opportunity to ask question(s) related to my admission, care plan and proposed hospital stay, and that such questions have been answered to my satisfaction.
- I declare that I have received and fully understood the information provided in this consent form, that I have been
 given an opportunity to ask questions relating to my admission, care plan and proposed hospital stay, and that
 all my questions have been answered to my entire satisfaction and there are no misconceptions or false hopes
 in my mind. I further declare that all fields (of this form) requiring insertion or completion were filled in my
 presence at the time of my signing this form.
- I, the above-named Patient / named patient's representative, do further hereby declare that I am above 18 years of age as on the date of signing this form, mentally sound and am giving consent without any fear, threat or false misconception.

IAGNOSIS:

CHRONIC KIDNEY DISEASE ON HD

ACCELERATED HYPERTENSION ACUTE PULMONARY EDEMA

NORMAL LV FUNCTION

PROCEDURE: CORONARY ANGIOGRAM DONE ON 29.12.2023 - MINIMAL CORONARY ARTERY DISEASE.

BRIEF HISTORY:

Mrs. Lalli. T, 45 years old Female, presented with complaints of chest pain on & off since 2 months and breathlessness (+). She was evaluated in ESIC hospital and advised Coronary angiogram and referred to Medway Heart Institute on 29.12.2023 for which she has been admitted.

ON EXAMINATION:

HR: 94bpm;

BP: 176/117mmHg;

SPO₂: 99% in room air

VS: S1S2+ murmur+; RS: Clear; CNS: NFND;

Abd: Soft

INVESTIGATIONS:

BLOOD: Hb- 9.9gm/dl, TWBC - 7070cells /cumm, PLT - 199000 cells/cumm, Urea - 64.17mg/dl, C eatinine – 6.60mg/dl, Sodium – 135mg/dl, Potassium – 4.14mg/dl, PT/INR – 10.3/0.8.

ECG: sinus rhythm, HR – 94bpm, LVH, T wave inversion in I, aVL, V5, V6.

ECHO: Calcification of base of RCC & NCC. 2/4 AR. 1/4 MR. 2.9mm PE, posterior to LV. No RWMA. Normal LV systolic function. EF – 58%. No clot / PHT. LA dilated.

CONSENT FOR CORONARY ANGIOGRAM / CORONARY ANGIOPLASTY

CONDITION AND PROCEDURE

Dr Anavelu:... has explained that I have the following condition:

Fat (cholesterol) and calcium can build up in the arteries like rust in old pipes. It can stop the flow of blood to the heart. This can cause angina or a heart attack. The Coronary Angiography procedure is performed to show up the amount of disease in the coronary arteries, the blood vessels that supply the heart with bleed. After an injection of local anaesthetic, a fine tube (catheter) is put into the artery in the groin/hand. The tube is carefully passed into each coronary artery in turn. A series of video pictures are taken using x-rays and an iodine containing contrast medium (x-ray dye). The contrast medium may be injected into the main pumping chamber of the heart (left ventricle). This helps us to find out whether you have any narrowing or blockage of your coronary arteries. The doctor can then tell you which treatment is best for you after carefully studying and discussing your pictures. This may be an operation such as a coronary by-pass or a procedure called an angioplasty (the arteries are widened using a small sausage shaped balloon). Sometimes, drugs alone may be a suitable option.

RISKS OF THIS PROCEDURE

The risk of coronary angiography depends on:

(i) The nature of coronary artery disease (ii) The pumping status of the heart (iii) Your age and general health These are some of the more serious risks that can happen, but are not the only risks:

Less than 1 in 10,000 (0.0001%)	(a) skin injury from radiation, causing, reddening of the skin				
1 in 1000 people (0.001%)	 (b) A stroke. This can cause paralysis and long term disability (c) Heart attack. (d) A dangerous reaction to the x-ray contrast medium (dye). If this happens, you may have severe reactions such as asthma, shock and convulsions. Death in extremely rare cases about 1 in 2,50,000 to 4,00,000 injections. (e) Need for major surgery to the leg at the puncture site. (f) Need for emergency heart surgery or angioplasty. (g) A higher lifetime risk from x-ray exposure. (h) Death 				
1 in 100 people (0.01%)	 (I)the heart may not beat in a proper rhythm which will need urgent treatment (j) Surgical repair of the groin puncture site. This may need a longer stay in hospital. (k) Minor reaction to contrast medium such as hives. (l) Loss/impairment of kidney function due to the contrast medium 				
1 in 20 people (0.05%) (m) Major bruising or swelling at the groin punture site					
Most People	(n) Minor bruising				

PATIENT CONSENT:
P acknowledge that Dr. has explained my medical condition and the proposed procedure. I understand the risks of the procedure, the anaesthetic including the risks that are specific to me and the likely outcomes if complications occur. The Doctor has explained other relevant treatment options their risks and my right to refuse the treatment. He has explained my prognosis and the risks of not having the procedure. I have been explained that some reprocessed items might be used once its sterility and integrity is confirmed. I was able to ask questions and raise concerns with the doctor about my condition, the procedure and its risks, and my treatment options. My questions and converns have been discussed and answered to my satisfaction. I understand that in the unlikely event of complications, I may require a blood transfusion, an additional procedure or surgery. The doctor has explained to me that if immediate life-threatening events happen during the procedure, they will be treated accordingly. I understand that no guarantee has been made that the procedure will improve the condition.

On the basis of the above statements,

I REQUEST TO HAVE THE PROCEDURE

TRANSRADIAL CORONARY ANGIOGRAM REPORT

Patient Name:	Mrs. LALLI.T		ID:	MHI202381552	
Age/Gender :	45 F		IPH:	IPH2023002632	
Cath No. :	3501		DOP:	29.12.2023	
Don	e by	Assisted by	y Technician		
Dr.Gnanavelu/	Dr.Salai Sudhan	Ms. Abinaya	Mr. Ram		

DIAGNOSIS: CKD ON HD; ACCELERATED HBP- RECENT PULM EDEMA; NORMAL LV FUNCTION

Access: Left Radial artery

Total exposure time: 6'40"

Hardware used: 5F sheath, 5F TIG, 5F JR

DAP: 18.50 Gy.cm2

Contrast used: VISIPAQUE 30 ml

Total RAK: 175 mGy

Medications given: Inj NTG 200 mcg & Inj Heparin 2500 IU IA

Hemodynamic data: Ao Pressure – 186/120(150) mmHg, HR – 105/min, Spo2 – 98%

Selective coronary angiogram done in multiple angulated views:

ARTERY	FINDINGS
LEFT MAIN	Normal. Bifurcates into LAD & LCX
LAD	Type 3 vessel. LAD is normal. Gives 3 diagonals and many septals. First and second diagonals are major vessels.
LCx	Non Dominant. Proximal LCX is normal. Distal LCX has luminal irregularities. Gives 2 OMs which are normal. OM1 is a major vessel.
RCA	Dominant. RCA is normal. PDA and PLv are normal.

FINDINGS: RIGHT DOMINANT SYSTEM; MINIMAL CORONARY ARTERY DISEASE

ADVICE: MEDICAL MANAGEMENT

Consu

Every heart beat counts

	BRADEN S	CALE FOR PREDICTI	NG PRESSURE INJUIT	Date: Time:	29 M	12	23
SENSORY PERCEPTION ability to respond meaning-fully to pressure-related discomfort	Completely Limited Unresponsive (does not moan, flinch,or grasp) to painful stimuli, due to diminished level of consciousness or sedation OR limited ability to feel pain over most of body	2. Very Limited Responds only to painful stimuli. Cannot communicate discomfort except by moaning or restlessness OR has a sensory impairment which limits the ability to feel pain or discomfort over 1/2 of body	3. Slightly Limited Responds to verbal commands, but cannot always communicate discomfort or the need to be turned OR had some sensory impairment which limits ability to feel pain or discomfort in 1 or 2 extremities	4. Mo Impairment Alesponds to verbal commands. Has no sensory deficit which would limit ability to feel or voice pain or discomfort	ੈ ਮ	Ч	
MOISTURE degree to which skin is exposed to moisture	1. Constantly Moist Skin is kept moist almost constantly by perspiration, urine etc. Dampness is detected every time patient is moved or turned	2. Very Moist Skin is often, but not always moist. Linen must be changed at least once a shift	3. Occasionally Moist Skip is occasionally moist, requiring an extra linen change approximately once a day	4. Rarely Moist Skin is usually dry, linen only requires changing at routine intervals	M	27	4
ACTIVITY degree of physical activity	Bedfast Confined to bed	2. Chairfast Ability to walk severely limited or non-existent. Cannot bear own weight and / or must be assisted into chair or wheelchair	3. Walks Occasionally Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair	4. Walks Frequently Walks outside room at least twice a day and inside room at least once every two hours during waking hours	3	7	
MOBILITY ability to change and control body position	Completely Immobile Does not make even slight changes in body or extremity position without assistance	2. Very Limited Makes occasional slight changes in body or extremity position but unable to make frequent or significant changes independently	3. Stight Limited Makes frequent through slight changes in body or extremity position independently	4. No Limitation Makes major and frequent changes in position without assistance	3	3	
NUTRITION usual food intake pattern	1. Very Poor Never eats a complete meal. Rarely eats more than any food offered. Eats 2 servings or less of protein(meat or dairy products) per day. Takes fluids poorly. Does not take a liquid dietary supplement OR Is NPO and / or maintained on clear liquids or IV's for more than 5 days		3. Adequate Lats over half of most meals. Eats a total of 4 servings of protein (meat, diary products) per day. Occasionally will refuse a meal, but will usually take a supplement when offered OR Is on a tube feeding or TPN regimen which probably meets most of nutritional needs	4. Excellent Eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and diary products. Occasionally eats between meals. Does not require supplementation	M	3	5
FRICTION & SHEAR	1. Problem Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair, requiring frequent re-positioning with maximum assistance. Spasticity, contractures or agitation leads to almost constant friction	2. Potential Problem Moves feebly or requires minimuma assistance. During a move skin probably slides to some extent against sheets, chair, restraints or other devices. Maintains relatively good position in chair or bed most of the time but occasionally slides down	3-No Apparent Problem Moves in bed and in chair independentl strength to lift up completely during move. Nor chair		3 19	7 V1
